Metronome

The Control Panel

Playback Volume

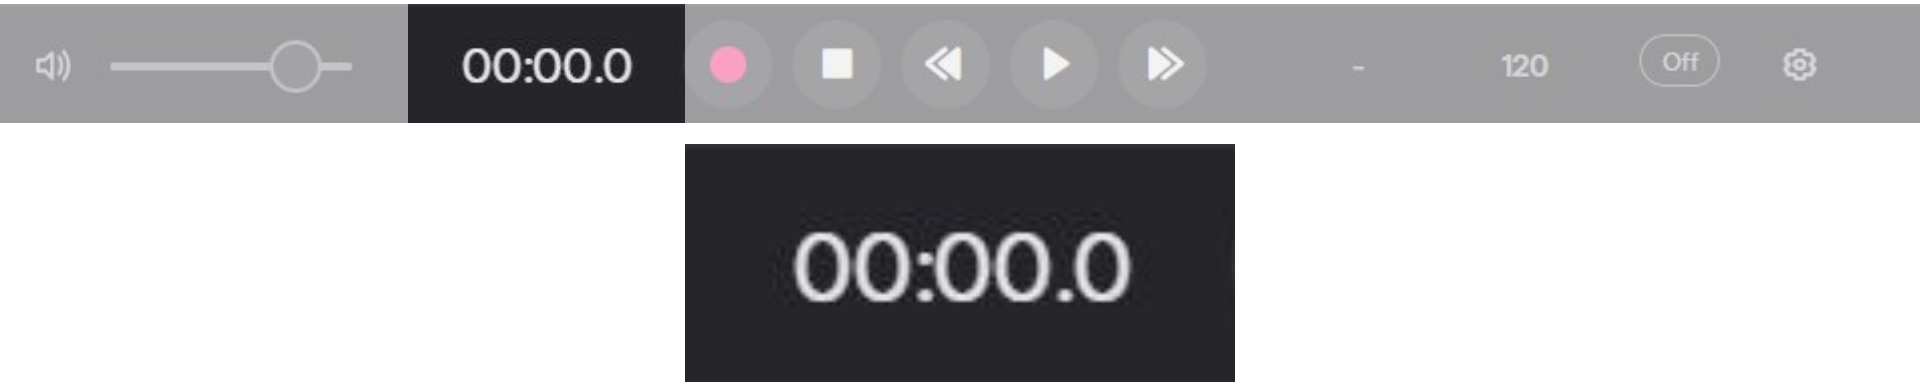

This control adjusts the overall output volume of your project

Slide the volume left and right to decrease and increase the volume

The Control Panel

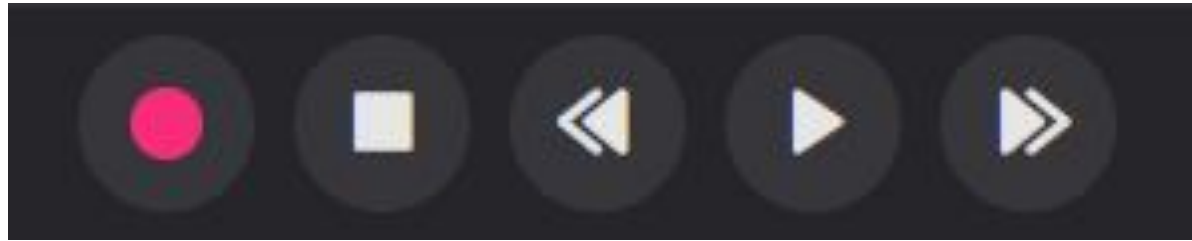

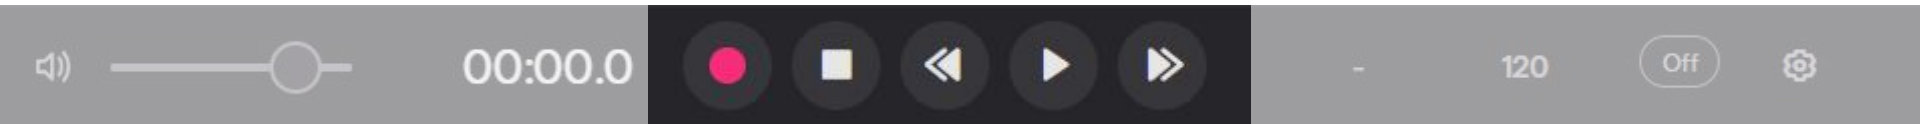

Timer/Counter

This control tracks the audio timeline in minutes and seconds

The Control Panel

Transport

Record

Stop

Rewind

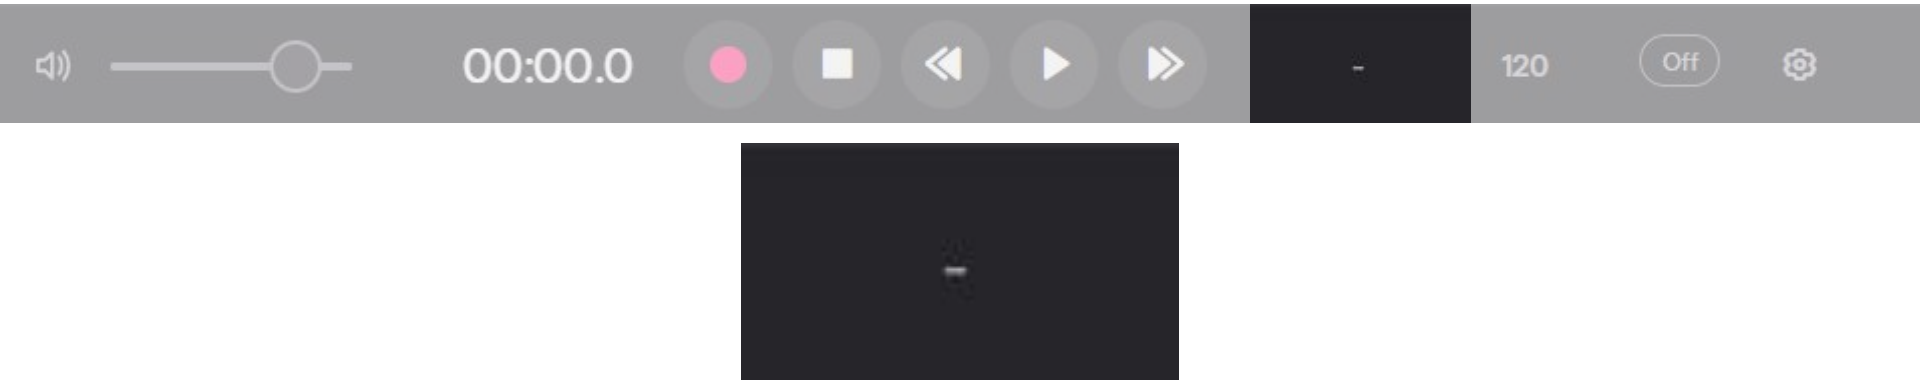

Play

Fast
Forward

These controls help you move around the project as well as enable recording.

The Control Panel

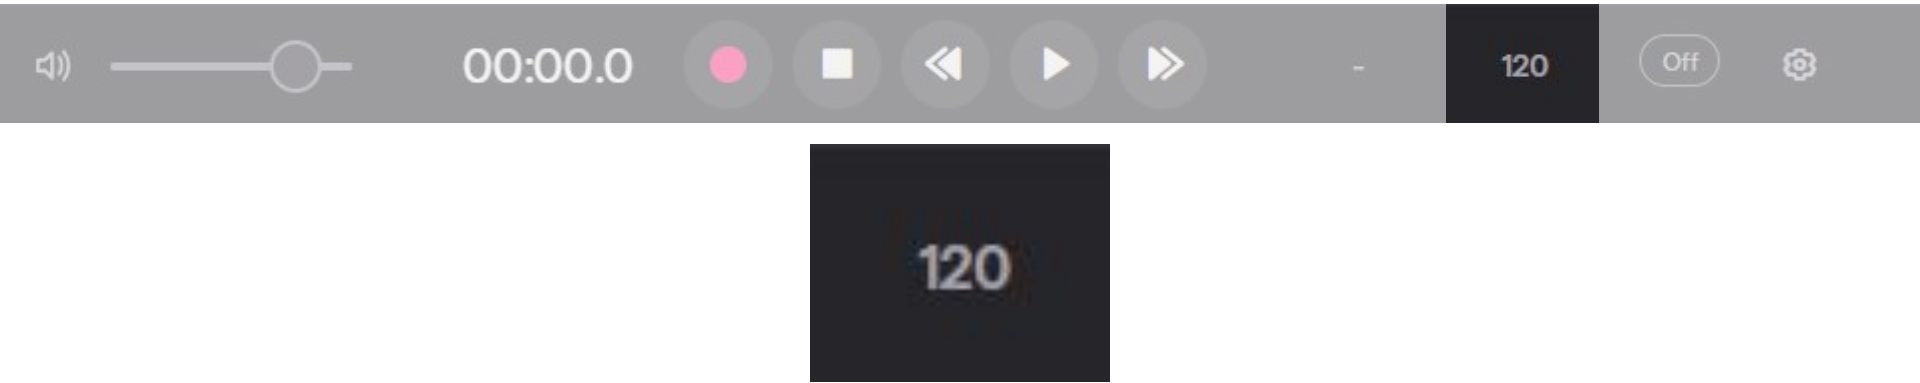

Key

This control allows you to set a key area when using midi loops

The Control Panel

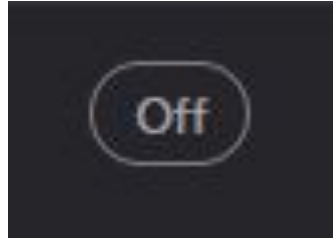

Tempo

This control allows you to set the tempo of the track. When creating audio tracks, this will set the tempo of the metronome. If using MIDI tracks, this will set the tracks and the metronome to this exact tempo.

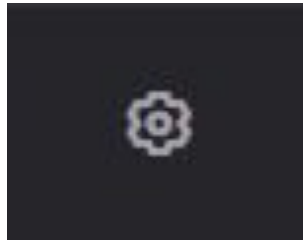

The Control Panel

Tempo

This control allows you to turn the metronome on and off.

The Control Panel Settings

This control allows you to adjust the sound, volume, and count-in before recording begins.
